

Business Requirements Document (BRD)

Project Title: *Customer Complaint Analysis Dashboard*

Business Owner: *Customer Support Head / Product Risk Manager*

Prepared by: *Deborah Deva Kirubai M – Business Analyst*

1. Project Overview

The organization receives millions of customer complaints annually across multiple product lines. However, complaint trends, company performance, and regional patterns are not monitored effectively. This project aims to develop an interactive dashboard that gives visibility into complaint volumes, categories, resolution performance, and customer impact.

2. Business Objectives

- Identify top complaint categories and products with the most issues.
 - Track company responses and their timeliness.
 - Analyze complaint volumes by state and time period.
 - Improve customer satisfaction by reducing unresolved or delayed cases.
-

3. Project Scope

In-Scope:

- Analysis of data from the CFPB complaints dataset.
- Dashboard displaying:
 - Total complaints
 - Complaints by Product, Issue, Company, and State
 - % Closed with Timely Response
 - Complaint trend over time
- Exportable summary reports

Out-of-Scope:

- Building a new complaint submission system
- Contacting customers or validating complaint authenticity

4. Stakeholders

Role	Name/Team
Business Owner	Customer Service Head
Data Team	Data Engineering
Analyst	Deborah Deva Kirubai M

5. Business Requirements

ID	Requirement
BR1	View total complaint counts by product
BR2	View monthly trend of complaints
BR3	Filter complaints by company and state
BR4	Identify top 5 companies with most complaints
BR5	Show % of complaints resolved "on time"
BR6	Highlight unresolved or delayed cases
BR7	Export summary as CSV or PDF

6. Functional Requirements

ID	Feature
FR1	Dashboard with interactive filters
FR2	Charts (Bar, Pie, Line, Table)
FR3	Daily/weekly data refresh
FR4	Color-coded flags for delayed responses
FR5	Mobile and browser responsive design

7. Non-Functional Requirements

- Dashboard load time < 3 seconds
 - Real-time or daily data refresh
 - Easy access by non-technical users
-

8. Assumptions

- Data is pre-cleaned and updated regularly.
 - No legal approval is required to analyze public data.
-

9. Constraints

- Limited dashboarding to Python or Tableau (no full web app).
- Limited to publicly available complaint data only.
