

Insight Summary : Customer Complaint Analysis

Project Title: *Customer Complaint Analysis Dashboard*

Dataset: *CFPB Public Complaints Data (8.7 million records)*

Analyst: *Deborah Deva Kirubai M*

◆ 1. Top Complaint Categories

- The **most frequent issues** are related to:
 - **Credit Reporting**
 - **Debt Collection**
 - **Credit Cards**
 - These three categories combined contribute to **over 60%** of all complaints.
 - This highlights the need for **compliance and service improvement** in these domains.
-

◆ 2. Companies with Most Complaints

- **Top 3 companies:**
 - **Experian**
 - **TransUnion**
 - **Equifax**

- These firms, part of the credit reporting ecosystem, receive the **highest number of consumer complaints**.
 - Repeated issues with these entities call for **regulatory reviews** and improved communication strategies.
-

◆ 3. Complaint Volume Trend

- Complaint volume shows a **cyclical pattern**, with **spikes in early quarters** of each year.
 - These spikes align with tax season and financial year transitions.
 - This trend suggests that **customer stress periods require proactive support responses**.
-

◆ 4. Timely Response Performance

- More than **85% of complaints were responded to on time**, indicating strong baseline performance.
 - However, the remaining 15% account for over **1 million delayed responses** — a critical customer dissatisfaction driver.
 - Introducing **SLA tracking dashboards** and alerts for delayed cases is recommended.
-

◆ 5. Geographic Insights

- **California, Texas, Florida, and New York** are the top states by complaint volume.
 - These populous states should be prioritized for **regional quality checks and service audits**.
-

◆ 6. Complaint Submission Channels

- Most complaints are submitted via the **Web**, followed by **Phone** and **Email**.
 - The web-first behavior implies the need for:
 - Better **UX on complaint portals**
 - Automated **feedback workflows**
-

◆ 7. Data Quality Observations

- Columns like **Tags**, **Consumer Disputed?**, and **Consumer Consent** have high missing values.
- To improve future analysis:
 - Enforce **mandatory fields**
 - Train agents/data systems to capture full responses

Recommendations Summary:

Area	Action
Product	Focus customer service resources on Credit Reporting, Debt Collection
Company	Engage compliance teams for top 3 complaint-heavy firms
Region	Target top 4 states for proactive audits
SLA	Alert system for overdue complaint responses
Dashboard	Deploy monthly complaint dashboards for real-time monitoring
Data	Improve data capture for better analytics
